

Seminar on Labor and Education Economics Winter Term 2025/2026

Prof. Nagler / Prof. Oberfichtner

Course Description

The seminar will cover a broad range of current topics in labor economics and economics of innovation. This term, we will focus on the reproducibility of empirical studies and each student will reproduce and extend one recently published paper of their choice using the AEA Data and Code Repository at ICPSR.

In an introductory session, students learn about the principles of scientific work and the scope of analysis that is expected. The remaining seminar then has two consecutive parts. **In the first part, students engage with the paper of their choice and reproduce its results** under the guidance of their advisor. At the end of this part, they present the papers' empirical analysis and their reproduction efforts. **In the second part, students extend the original analysis.** For example, they can add robustness checks or explore hypotheses not covered in the original paper. At the end of this part, they again present their findings. For both presentations, students also have to submit executable Stata code. **Note that students may have to work at the CIP pool or alternatively buy a license at own cost to work with Stata.**

Organizational details and grading

- The seminar is jointly organized by Prof. Nagler and Prof. Oberfichtner.
- Students who want to participate should submit a participation form (available on the website of the Assistant Professorship in Labor & Innovation Economics) to markus.nagler@fau.de until **October 12th, 2025**. Please note that the maximum number of participants is 8 students.
- Information on how to reproduce a paper will be provided in an introductory session on **October 22nd, 9.45 – 11.15, room LG 5.155**.
- Students choose a suitable paper and submit their choice by **November 5th**. Topics will be confirmed by **November 12th**. After being assigned to a specific topic, students can repeal their participation within one week. After this deadline has passed, participation in the seminar is mandatory. Students not completing the seminar will fail.
- The first presentation is on **December 15th, 2025, 9.00 – 14.30, room LG 5.153**.
- All Stata code must be submitted by **January 18th, 2026**.
- The second presentation is on **January 30th, 2026, 9.00 – 14.30, room LG 5.153**.
- Grading: The overall grade will reflect the quality of the first presentation (50%), of the second presentation in the seminar (40%), and of the Stata code (10%). To pass the seminar, students must obtain at least a grade of 4.0 in each of the parts.
- Presentations should last 20 minutes and we reserve an additional 10 minutes for questions and discussion.
- **NOTE:** Students must also register for the seminar on a special registration day so they can receive a grade. The date will be announced shortly before the term.
